### **DETAILED ACTION**

## Response to Arguments

Applicant's arguments filed on 8/27/2004 have been fully considered but they are not persuasive. Applicant's arguments are not understood regarding the preservation of the isolation barrier and not channeling of noise. Applicant's attention is directed to Figure 1 and port 142 of Critchlow et al.'555 clearly indicating a port through the "isolation barrier" which channels a fiber optic cable. The control panel is addressed below. Note that the single connection as set forth in the remarks is not claimed.

### Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Critchlow et al. '555 in view of Kormos et al. '285.

Critchlow et al.'555 teach a power injector system and a method for use with a magnetic resonance imaging system installed at least in part within an electromagnetic interference shielded room electrically accessible via a penetration panel (in Figure 1, scanner room 115 which is electrically accessible via penetration panel 142 also see paragraph 0014), the power injector system comprising: a power head adapted for operation within the shielded room to controllably inject a compound into a patient (see paragraph 0030 and paragraphs 0042-0045;

Application/Control Number: 09/851,462

Art Unit: 3737

referring to the components of the injector including the power being enclosed in a Faraday cage 137 in order to shield and reduce EMI noise) and a control panel 110 as indicated in Figure 1 to control the injection process by signals transmitted through the fiber optic 140 (see 0038).

Critchlow et al.'555 do not teach a power supply for operation outside the shielded room to receive utility electrical power; and a power connection configured to couple electrical power through the penetration panel between the power supply outside of the shielded room and the power head for actuating the power head.

In the same field of endeavor, Kormos et al.'285 teach the use of shielded spaces to enclose the equipment of choice in the MRI shielded room (see col. 5, lines 27-56). Kormos et al.'285 further teach the modification of using a remote power supply with a coupled shielded wire thereby removing the power from the MRI room in order to reduce EMI noise (see col. 6, lines 9-33).

It would have been obvious to one skilled in the art at the time that the invention was made to have modified Critchlow et al.'555 in view of Kormos et al.'285 to incorporate the use of a remote power supply with a shielded wire instead of an enclosed power supply as an alternative way of reducing EMI noise.

Critchlow et al.'555 further teach a power control adapted for operation within the shielded room interposed between the power supply and the power head, the power control operable to selectively actuate the power head with power received via the power connection from the power supply (see paragraphs 0033-0034 and referring to the power drive card 230).

Art Unit: 3737

#### Conclusion

3. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eleni Mantis Mercader whose telephone number is 703 308-0899. The examiner can normally be reached on Mon. - Fri., 8:00 a.m.-6:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on (703) 308-3552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
